

Flip Down Guide Class 20/26

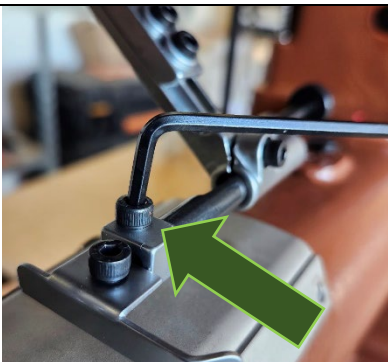

STEP ONE: Remove the two screws on the back of your machine, place the silver mounting bracket on the machine with the screw holes in line with the far-left side, then screw in the bracket firmly.

STEP TWO: Install the Flip Guide using the two smaller screws accompanied with two washers into the slit in the top right of the guide.

STEP THREE: To lower your guide to be in line with the needle, take your Allen keys provided to you, and turn these two screws COUNTER-CLOCKWISE to loosen, then pull down gently. To tighten screws, turn CLOCKWISE.

STEP FOUR: To move the straight edge guide left/right turn this screw forward or backward. This will allow your guide to be closer or farther away from the needle.

STEP FIVE (Optional if you're sewing round edges): To change from straight edge guide to round edge guide, remove the 2nd from edge screw, remove the flat edge, then out round edge guide onto the peg. and tighten the screw.

!!! If you need assistance installing your Class 20/26 Flip Guide, you can watch **Seve Van Plew's** videos on YouTube of "Installing Flip Guides" Or you can call the store at **866-962-9880** and ask to speak with a Class 26 Technician. **!!!**
